(Managing Director Institut Bauen und Umwelt e.V.)

Mechanical Lock Cylinder revy

Owner of the declaration

dormakaba International Holding GmbH
DORMA Platz 1
58256 Ennepetal
Germany

Declared product / declared unit

1 piece of the product: Mechanical Lock Cylinder revy consisting of the following items:

- Key
- Cylinder
- Product packaging

Scope:

This Environmental Product Declaration refers to a specific Mechanical Lock Cylinder revy manufactured by dormakaba. The production site is located in city Herzogenburg (Austria). The EPD is representative for the Mechanical Lock Cyclinder revy 10, revy 20 and revy 30.

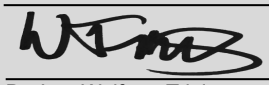

Green electricity with Guarantee of Origin (GoO) is being used at this production site.

The data represents the year 2024.
The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as *EN 15804*.

Verification

The standard EN 15804 serves as the core PCR
Independent verification of the declaration and data according to ISO 14025:2011
☐ internally ☒ externally

Dr.-Ing. Wolfram Trinius,
(Independent verifier)

Product

Product description/Product definition

The dormakaba Mechanical Lock Cylinder revy system family with profile offers a high-quality, patented locking system. It can be combined with selected special functions for even greater safety, convenience or cylinder protection. The new reversible key system can also be manufactured locally by authorized security partners according to customer requirements. This makes it easy to obtain additional keys or to expand the locking solution, in the form of serial key or locking system.

For the Mechanical Lock Cylinder revy the standards which can be applied are the following:

- *DIN 18252*
- *EN 1303*

[...]

Application

The Mechanical Lock Cylinder revy is a versatile reversible key system suitable for a wide range of applications, including:

- Residential use (e.g., front doors, garden gates, garages, letterboxes)
- Multi-housing complexes
- Commercial and office buildings

Technical Data

The Mechanical Lock Cylinder revy has following technical properties:

Lock Cylinder	
Overlapping key profile	Yes
Number of rows	3
Number of active pins	Up to 10
Total number of pins	Up to 16
DIN EN 1303; Key related security	Class 6*
DIN EN1303, Attack resistance	Option for Class D
DIN 18252; Attack resistance	Option for Class C or D
Double cylinder with increased anti–drill and pulling protection (VPP)	Options VdS B+ or VdS BZ+
Individual locking	X
Simultaneous locking	X
Medium to large master key system	X

*Class 6 version revy 30 only.
Performance data of the product with respect to its characteristics in accordance with the relevant technical provision which can be applied are mentioned above.

Base materials/Ancillary materials

The major material composition including the packaging of the product is listed below:

Name	Value	Unit
Brass	70	%
Packaging	12	%
Copper	10	%
Plastics	6	%
Steel	1	%
Stainless Steel	1	%

The product includes partial articles which contain substances listed in the Candidate *List of REACH Regulation 1907/2006/EC* (date: 25.01.2025) exceeding 0.1 percentage by mass: yes

• Lead (Pb): 7439-92-1 (CAS-No.) is included in some of the alloys used. The concentration of lead in each individual alloy does not exceed 3.5% (by mass).

The *Candidate List* can be found on the ECHA website address: https:echa.europa.eu/de/home.

Reference service life

The reference service life of the Mechanical Lock Cylinder revy is about 10 years, depending on the application and frequency of use. For repairs and renewals, suitable spare parts are available. The Mechanical Lock is tested and certified to *EN 1303*, meaning they are designed to withstand a minimum of 100,000 cycles.

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: Mechanical Lock Cylinder revy including packaging

Name	Value	Unit
Declared unit	1	piece/product
Mass of declared Product without Packaging	0.22	kg
Mass of Packaging	0.04	kg
Total mass of the Product	0.26	kg

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4+ A5)

Production - Module A1-A3
The product stage includes: — A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes), — A2, transport to the manufacturer, — A3, manufacturing and assembly including provision of all materials, products and energy green electricity with Guarantee of Origin (GoO), as well as waste processing up to the end-of-waste state.
Construction stage - Modules A4-A5
The construction process stage includes:
— A4, transport to the building site; — A5, installation into the building; including provision of all materials, products and energy, as well as waste processing up to the end-of-waste state or disposal of final residues during the construction process stage.

End-of-life stage– Modules C1-C4 and D

The end-of-life stage includes: — C1, de-construction, demolition: — C2, transport to waste processing; — C3, waste processing for reuse, recovery and/or recycling; — C4, disposal; including provision and all transport, provision of all materials, products and related energy and water use. Module D (Benefits and loads beyond the system boundary) includes: — D, recycling potentials, expressed as net impacts and benefits.

Geographic Representativeness

Land or region, in which the declared product system is manufactured, used or handled at the end of the product´s lifespan: Global

Comparability

Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account. Background database: GaBi, SP40.

LCA: Scenarios and additional technical information

Characteristic product properties of biogenic carbon

Name	Value	Unit
Biogenic carbon content in product	-	kg C
Biogenic carbon content in accompanying packaging	0.01	kg C

Austria is considered for A3.

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO_2.

Transport to the building site (A4)

Name	Value	Unit
Litres of fuel	0.00276	l/100km
Transport distance	100	km
Capacity utilisation (including empty runs)	55	%

The product is transported via truck. The product is stored in the dormakaba logistic center in Herzogenburg. The main distribution region is Europe. In order to allow scaling to a specific point of installation 100 km are declared.

Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper / technical documentation)	0.03	kg

Reference service life

Name	Value	Unit
Life Span according to the manufacturer	10	a

End of life (C1-C4)

C1: The product dismantling from the building is done manually without environmental burden.
C2: Transport to waste management is 50 km.
C4: There are no mineral substances that require landfilling; therefore, no expenses are incurred in module C4.

Name	Value	Unit
Collected separately waste type	0.22	kg
Recycling	0.21	kg
Energy recovery	0.01	kg

The product is disassembled in a recycling process. Material recycling is then assumed for metals. The plastic components are assumed to be incinerated with energy recovery. The minor proportions of residues arising from the recycling process are landfilled. Region for the End of Life is: Europe.

Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit
Recycling	100	%

The collection rate is 100 %.

SQP	SQP	8.55E+00	7.68E-05	3.68E-03	0	3.37E-05	5.27E-03	0	-1.07E+00

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator “Potential Human exposure efficiency relative to U235”. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators “abiotic depletion potential for non-fossil resources”, “abiotic depletion potential for fossil resources”, “water (user) deprivation potential, deprivation-weighted water consumption”, “potential comparative toxic unit for ecosystems”, “potential comparative toxic unit for humans – cancerogenic”, “Potential comparative toxic unit for humans - not cancerogenic”, “potential soil quality index”. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.

This EPD was created using a software tool.
