Sensor Barrier Argus 40

Owner of the declaration

dormakaba International Holding GmbH
DORMA Platz 1
58256 Ennepetal
Germany

Declared product / declared unit

1 piece of the product: Argus 40 basic equipment consisting of the following items:

- Sensor Barrier (passage width 650 mm)
- Door wings
- Product packaging

Scope:

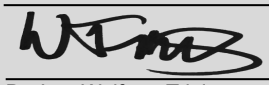

This Environmental Product Declaration refers to a specific Sensor Barrier Argus 40 manufactured by dormakaba.
The production site is located in Bühl (Germany).

Green electricity with Guarantee of Origin (GoO) is being used at this production site.
The owner of the declaration shall be liable for the underlying information and evidence; the IBU shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

The EPD was created according to the specifications of EN 15804+A2. In the following, the standard will be simplified as *EN 15804*.

Verification

The standard EN 15804 serves as the core PCR
Independent verification of the declaration and data according to ISO 14025:2011
☐ internally ☒ externally

(Independent verifier)

Product

Product description/Product definition

Argus Sensor Barriers offer modern access solutions that combine functionality with aesthetic flexibility.

The Sensor Barrier Argus 40 is sleek and compact, with a length of just 1,200 mm, also suitable for installation situations with limited spaces. It is constructed using high-grade materials and equipped with essential functional components, it complies reliably with standard safety specifications.
The basic equipment includes two door wings made out of polycarbonate.

For the Sensor Barrier Argus 40 the standards which can be applied are the following:

- *EN 16005*
- *EN 60335*
- *EN 61000*
- *2006/42/EC*
- *2014/30/EU*
- *2011/65/EU*
- *ISO 12100*
- *ISO 13849*
- *ISO 9001*

The CE marking takes into account the proof of conformity with the respective harmonized standards based on the legal provisions above.

Application

The Sensor Barrier Argus 40 can be used for convenient entry into:

- Office and administrative buildings
- Ministries and government buildings
- Banks and financial institutions
- Industrial buildings
- Schools and universities

Technical Data

The Sensor Barrier Argus 40 has following technical properties:

Name	Value	Unit
Operating Temperature	20 - 30	°C
Operating Humidity	90	%
Ambient temperature	5 - 40	°C
Interlock height	990	mm
Passage width	650	mm
Total width	1060	mm
Power supply	100 to 240	VAC

Performance data of the product with respect to its characteristics in accordance with the relevant technical provision which can be applied are mentioned above.

Base materials/Ancillary materials

The major material composition including packaging of the product is listed below:

Name	Value	Unit
Aluminium	62	%
Paper	13	%
Steel	11	%
Plastics	7	%
Electronics	7	%

The product includes partial articles which contain substances listed in the *Candidate List* of REACH Regulation 1907/2006/EC (date: 25.01.2025) exceeding 0.1 percentage by mass: yes

- Lead (Pb): 7439-92-1 (CAS-No.) is included in some of the alloys used. The concentration of lead in each individual alloy does not exceed 4% (by mass).

The *Candidate List* can be found on the *ECHA* website address: https:echa.europa.eu/de/home.

Reference service life

The reference service life of the Argus 40 is about 20 years, depending on the application and frequency of use. For repairs and renewals, suitable spare parts are available. The Argus 40 is tested and certified to *EN 16005*, meaning they are designed to withstand a minimum of 1.000.000 cycles.

LCA: Calculation rules

Declared Unit

The declared unit is 1 piece of the product: ARGUS 40 including packaging

Name	Value	Unit
Declared unit	1	pce
Mass Reference	105,18	kg/pce
Mass of Product without Packaging	91,58	kg
Mass of Packaging	13,6	kg

System boundary

The type of EPD is: cradle to gate with options, modules C1–C4, and module D (A1–A3 + C + D and additional modules: A4+ A5)

Production - Module A1-A3

The product stage includes:
— A1, raw material extraction, processing and mechanical treatments, processing of secondary material input (e.g. recycling processes), — A2, transport to the manufacturer, — A3, manufacturing and assembly including provision of all materials, products and energy (green electricity with Guarantee of Origin (GoO)), as well as waste processing up to the end-of waste state.

Construction stage - Modules A4-A5

The construction process stage includes:

— A4, transport to the building site; — A5, installation into the building; including provision of all materials, products and energy, as well as waste processing up to the end-of-waste state or disposal of final residues during the construction process stage.

Use stage - Module B6
The use stage related to the operation of the building includes:
— B6, operational energy use

End-of-life stage– Modules C1-C4 and D
The end-of-life stage includes:
— C1, de-construction, demolition: — C2, transport to waste processing; — C3, waste processing for reuse, recovery and/or recycling; — C4, disposal; including provision and all transport, provision of all materials, products and related energy and water use. Module D (Benefits and loads beyond the system boundary) includes:
— D, recycling potentials, expressed as net impacts and benefits.

Geographic Representativeness
Land or region, in which the declared product system is manufactured, used or handled at the end of the product´s lifespan: Global

Comparability
Basically, a comparison or an evaluation of EPD data is only possible if all the data sets to be compared were created according to *EN 15804* and the building context, respectively the product-specific characteristics of performance, are taken into account. Background database: GaBi, SP40.

LCA: Scenarios and additional technical information

Characteristic product properties of biogenic carbon

Name	Value	Unit
Biogenic carbon content in product	-	kg C
Biogenic carbon content in accompanying packaging	5.01	kg C

Bühl (Germany) is considered for A3.

Note: 1 kg of biogenic carbon is equivalent to 44/12 kg of CO_2.

Transport to the building site (A4)

Name	Value	Unit
Litres of fuel	0.00276	l/100km
Transport distance via truck (from plant to habor)	300	km
Capacity utilisation (including empty runs)	55	%
Transport distance (for scaling)	100	km
Transport distance via ship	13.000	km

The product is transported via truck and ship. The main distribution region is Europe and Asia with the calculated transport distances. In order to allow scaling to a specific point of installation 100 km are declared as well.

Installation into the building (A5)

Name	Value	Unit
Waste packaging (paper, including technical documentation and plastic)	13,6	kg

Reference service life

Name	Value	Unit
Life Span according to the manufacturer	20	a

Operational energy use (B6)

Name	Value	Unit
Electricity consumption for 1 year	170,2	kWh
Days per year in use	365	days
On mode per day	1.1	h
Idle mode per day	22.9	h
On mode power	70	W
Idle mode power	17	W

End of life (C1-C4)
C1: The product dismantling from the building is done manually without environmental burden.
C2: Transport to waste management is 50 km.

Name	Value	Unit
Collected separately waste type	91.6	kg
Reuse	-	kg
Recycling	77.2	kg
Energy recovery	7.19	kg
Landfilling	7.17	kg

The product is disassembled in a recycling process. Material recycling is then assumed for metals and electronics. The plastic components are assumed to be incinerated with energy recovery. Electronics and minor proportions of residues arising from the recycling process are landfilled.
Region for the End of Life is: Global.

Reuse, recovery and/or recycling potentials (D), relevant scenario information

Name	Value	Unit
Recycling	100	%

The collection rate is 100 %.

LCA: Results

EF version 3.0.

PM = Potential incidence of disease due to PM emissions; IR = Potential Human exposure efficiency relative to U235; ETP-fw = Potential comparative Toxic Unit for ecosystems; HTP-c = Potential comparative Toxic Unit for humans (cancerogenic); HTP-nc = Potential comparative Toxic Unit for humans (not cancerogenic); SQP = Potential soil quality index

Disclaimer 1 – for the indicator “Potential Human exposure efficiency relative to U235”. This impact category deals mainly with the eventual impact of low-dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure or radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, radon and from some construction materials is also not measured by this indicator.

Disclaimer 2 – for the indicators “abiotic depletion potential for non-fossil resources”, “abiotic depletion potential for fossil resources”, “water (user) deprivation potential, deprivation-weighted water consumption”, “potential comparative toxic unit for ecosystems”, “potential comparative toxic unit for humans – cancerogenic”, “Potential comparative toxic unit for humans - not cancerogenic”, “potential soil quality index”. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high as there is limited experience with the indicator.

This EPD was created using a software tool.
