Taraflex® Sports Flooring

Where champions play™

Gerflor®

Champions in Sustainability

81%

Biocontent, Mineral & Recycled*

Taraflex® contains 24% plant residues from responsible sources. We recycle soya waste discarded by the animal feed industry.

Result: fewer fossil content and less carbon.

Best in class carbon footprint

Thanks to 360° ecoconception, Taraflex EPD is the lowest of the sports flooring market.

A good choice for decarbonising your projects.

100 % recyclable

All Gerflor floorings are 100% recyclable and eligible to Gerflor Second Life collection and recycling program. Free collection of installation waste is available in 10 countries.

*Taraflex® Evolution solid colours
** Vinyl is made from two primary ingredients: salt (abundant mineral) and ethylene (fossil)

To face the climate emergency and the depletion of natural resources, our responsibility is to continually reduce the environmental impact of our products. Thanks to its high natural and recycled content, Taraflex® achieves an exemplary carbon footprint, without compromising performance.

Together, we can stride towards a greener future, one step at a time.

0047 - Mallow / Y = 41.6

6553 - Fern / Y = 20.9

“Sport and well-being has become an essential part of our daily lives, the balance between physical and mental fitness is like a rule of life for some people. This new palette of softer, more contemporary colours create the right ambience for users looking for places that combine sport and relaxation but also to the expectations of architects for new sports complexes, which are often increasingly integrated into the environment. The two new shades of green (sage and fern) are much closer to the shades found in nature and can be blend perfectly with our wood designs. Terracotta (clay) is a colour that has been used for a long time in many sports surfaces such as tennis and athletics and this earthy colour provides a reassuring touch. We’ve reworked beige (new ecru) to make it more neutral and blend in with all the other colours. Mauve (mallow) is the palette’s most playful, trendiest touch.”

Portable

A male athlete in a wheelchair is positioned on a green boccia court, holding a red ball. He is wearing a dark blue long-sleeved shirt with "THE NORTH FACE" on the sleeve and dark blue trousers. To his right is a specialized green and black boccia chair. In the background, several national flags are hanging on a blue wall, and a digital clock displays "10 42". Another person in a red shirt is visible in the background. The floor is green with white lines.

At Gerflor, we embody these principles by designing Taraflex® sports flooring to promote an inclusive experience. We are proud to promote inclusion by designing products for Paralympic sports such as sitting volleyball and boccia. It enables everyone to actively participate and feel valued in the world of sport.
